

Littmann Classic II S.E.

The 'industry standard' stethoscope - the 28 inch (71,1cm) Classic II S.E. Stethoscope. The 3M™ Littmann® Classic II S.E. Stethoscope features a patented tunable diaphragm on one side, augmenting the traditional bell function of the opposite side. The patented tunable diaphragm alternates between bell and diaphragm modes with a simple pressure change on the chestpiece.

- Single-lumen tubing
- Patented 3M™ Littmann® Snap Tight soft-sealing eartips
- Comfortably angled anatomically correct headset
- Patient-friendly nonchill rim and diaphragm
- 3 Year Warranty

As a major 3M™ Littmann® dealer, we will always try and beat any confirmed fully delivered advertised price from any other supplier with available stock (although we do check competitor prices on a daily basis!) Phone us to see how much we can beat it by!!

Littmann 3000 Electronic Stethoscope

- Ambient Noise Reduction - reduction of distracting room noise by 75% - ideal for high noise environments such as ambulances etc.
- Hand artifact and frictional noise reduction
- Versatile chestpiece suitable for adults, children and infants
- 18 times sound amplification
- Black colored tubing
- Runs on a single AAA battery with an expected life of around 200 hours or approximately six months average usage
- Automated audible low battery warning to ensure correct timed replacement of battery

Hear the difference:

The 3M™ Littmann® Electronic Stethoscope Model 3000 allows you to tune out the room when you turn up the volume. 3M's new Ambient Noise Reduction technology reduces distracting room noise by an average of 75% (- 12 dB) over the bell and diaphragm operating range. This stethoscope is uniquely equipped to help you pick up difficult-to-hear heart, lung and other body sounds even when the world around you is filled with distracting noise.

How Ambient Noise Reduction (ANR) works:

The proprietary Ambient Noise Reduction technology internal to the chestpiece, acoustically cancels out an average of 75% of distracting room noise, greatly enhancing overall utility. This acoustic effect is different from electronic filtering, which may also filter out some portions of body sounds clinicians need to hear.

"I have been using the 3000 for about six weeks now in the Ambulance setting and I have found it invaluable, the ambient noise reduction feature is a great help in the noisy pre hospital and ambulance field, it is extremely easy to use, lightweight, flexible and robust."

- Gary Newton SRPara

Clinical Support Officer (Paramedic), Dorset Ambulance Service

Littmann 4100WS Electronic Stethoscope

Featuring amplification up to 18 times greater than most advanced conventional 3M™ Littmann® Stethoscopes and proprietary Ambient Noise Reduction (ANR) technology allowing you to reduce ambient noise by an average of 75% (-12dB) without eliminating critical body sounds.

- Specially designed to pick up difficult-to-hear heart and other body sounds
- Amplification up to 18 times greater than most advanced conventional 3M™ Littmann® Stethoscopes. Ambient Noise Reduction (ANR) technology allowing you to reduce ambient noise by an average of 75% (-12dB) without eliminating critical body sounds.
- Three response modes. Bell mode for frequencies 20-200Hz. Diaphragm mode for frequencies 100-500Hz. A unique extended range mode for frequencies 20-1000Hz
- Recording, storage and playback capabilities for six different auscultations, available at normal and half speed
- Infrared data transmission of recorded sounds to either another Model 4100WS or for download to an IBM-compatible PC, providing the option to share or store sounds
- Patented Littmann® Snap tight Soft-Sealing Eartips
- Lightweight alloy eartubes and double-leaf binaural spring for more flexibility

With the 3M™ Littmann® Electronic Stethoscope Model 4100 and accompanying 3M™ Sound Analysis Software, what you hear can also be what you see and share with others. This exquisite, state-of-the-art auscultation instrument comes with proprietary software that lets you see exactly what you're hearing on your IBM-compatible computer or Pocket PC. This hardware and software combination will enhance teaching opportunities, serve as a diagnostic aid and help you make more effective use of telemedicine.

This high-quality I.D. tag is both durable and attractive. The adjustable design allows it to fit securely on all Littmann stethoscope models at the yoke area.

Our permanent high quality engraving will personalize your ID tag with your name etc and may ensure that your stethoscope is returned to you if lost.
